Focused on Interim Healthcare Leadership

NHS Solutions is an industry leading, specialty hospital search firm focused on short-term manager, director, VP, and C-level clinical and non-clinical management positions. Some companies focus on locum tenens and travelling nurses. Others provide retained or contingent permanent search and/or consulting services. A few of these companies 'add on' interim staffing as an opportunistic afterthought. At NHS Solutions all we do is interim staffing. As a result, we have become nationally recognized as best-in-class because of our successful focus.

Proven Transitional Hospital Leaders

NHS Solutions consistently provides experienced leaders who solve complex challenges facing hospitals today. Whether it is providing support through a Joint Commission review, increasing surgical services revenue, reducing ED cost, controlling overtime in Med Surg, improving patient satisfaction scores or assisting in the delicate task of closing a hospital, NHS Solutions management professionals have the demonstrated experience to achieve results and improve performance.

Three Unique Pricing Models

All-inclusive model. This includes all the direct and indirect costs associated with an interim employee in one fee. There are no additional fees or "soft costs" for the hospital simplifying the budget process.

Fee plus expenses model. You receive the full support of the all-inclusive model but the expenses are invoiced as incurred with no markup and full transparency.

Fee only model. The hospital hires the employee and pays the interim expenses directly. NHSS issues a bi-weekly service fee as long as the interim is on assignment with no minimum term commitments.

Why Work with NHS Solutions

Proven results. We have one of the largest databases of proven, active interim leaders in the country.

Reduced risk. We only use W2 employees and avoid any risk of employee misclassification.

Best-in-class support. We are fast, flexible, efficient and reasonable. Our employees are empowered to make decisions.
